FOR IMMEDIATE RELEASE

**CHLORKING X-GEN ON-SITE CHLORINE GENERATOR
RECEIVES NSF-50 CERTIFICATION.**

(On-site chlorine generator specifically designed for commercial pools a first for the industry with a unique pH neutral chlorine capability)

ChlorKing Inc. a manufacturer of commercial salt chlorinators announced today that it has received NSF-50 certification on its widely anticipated range of X-GEN on-site chlorine generators for commercial swimming pools.

This revolutionary generator combines over 15 years of ChlorKing's experience in the U.S. commercial swimming pool market and over 4,000 commercial salt chlorinator installations, with some of the greatest electro chemical minds in the industry.

ChlorKing's X-GEN generators are currently available in 20 and 40lb / day models and feature a unique pH neutral module, which allows for the pH in the production tank to be controlled, thus delivering **neutral pH chlorine** to the swimming pool.

"This commercial generator with our unique pH neutral chlorine will change the commercial swimming pool industry" said Steve Pearce, Executive Vice President and C.O.O of the corporation.

For more information on this and other ChlorKing products please contact
