

FOR IMMEDIATE RELEASE

Ron Neely Joins Community as Development Manager

CHESTER, PA – Community Professional Loudspeakers has announced the appointment of Ron Neely to the position of Development Manager. In his new position, Neely will be charged with the management of engineering project schedules, coordinating new product introductions, and developing software products.

With more than twenty years of experience in software and hardware development, Neely brings a wealth of knowledge in professional audio, communications and network management in real-time environments. He has previously held technology development positions at IPC Command Systems, Iridian Technologies and QSC Audio.

"Ron's vast expertise in software and product development makes him a key addition to our team at Community," remarked Chris Barrow, Community Product Manager. "Ron's background in computer interfaced audio technology and networking is ideally aligned with Community's current goals and objectives in engineering and product development."

"Community Professional Loudspeakers is well known for many innovative 'firsts' in sound reinforcement throughout its 40 year history," Neely stated. "I look forward to being a member of this forward-thinking team, and helping Community to continue leading the way by bringing many more innovative products to our industry."
